

PRESS RELEASE

Avea's execution will see it gain market share over the next three years in Turkey's mobile operator space, according to new mobile operator market research report by IEMR

Vancouver, October 16, 2008 – IE Market Research Corp. (IEMR), the Canadian-based provider of market intelligence services, announced today the release of its 4Q08 Turkey Mobile Operator Forecast.

"The 4Q08 Mobile Operator Forecasts demonstrate IEMR's capability to gather information from a variety of global resources and model it into accurate and timely forecasts for our clients," said Nizar Assanie, Vice President of Research at IEMR. "Clients will find the information easily accessible, comprehensive, and exceptionally relevant to enable them to make sound business and investment decisions about mobile operators and vendors strategies".

IEMR's Turkey Mobile Operator Forecast covers up to 65 financial and operational metrics on three wireless operators. Notable highlights of the 4Q08 Turkey Mobile Operator Forecast include:

- We have revised downward our subscriber growth figures for Turkey, given recent quarterly subscriber growth figures announced by operators. We are forecasting that total subscribers in Turkey will increase from our projected 68.0 million in 2008 (previously 69.1 million in 2008) to our forecasted 76.7 million subscribers in 2010 (previously 78.6 million subscribers in 2010).
- We are revising downward our previous projections of wireless penetration in Turkey. The level of wireless penetration in Turkey will increase from 91.8% in 2008 to 100% in 2010 (previously 102.4% in 2010).
- The largest operator, Turkcell, will continue to provide wireless services to a majority of subscribers in Turkey. In 2010, our models predict market shares (by subscribers) of the three operators – Turkcell, Vodafone, and Avea (Turk Telekom) – will be 50.5%, 29.0% and 20.5% respectively.

IEMR's Global Mobile Operator Forecast covers up to 65 operational metrics of 213 mobile operators in 50+ countries, making up 80% of the world's population. Forecasts are based on our proprietary, country-specific forecasting models. These models deploy multiple regression analysis and cross-impact matrices that estimate relationships between subscriber data, technology use and deployment data, overall economic and demographic changes expected in a particular country; and relate these to company operational and financial metrics.

About IE Market Research Corp.:

IE Market Research Corp. ("IEMR") is a market intelligence and business strategy consulting firm. Our goal is to assist our clients build value and compete in international markets. We build value in four sectors: wireless telecommunications, health care, finance, and government. We build value for our clients by undertaking international brand perception surveys, consumer satisfaction surveys, distributor/channel partner selection and due diligence, market size and opportunity assessments, competitor strategy assessments, government regulatory analysis, and public opinion surveys.

We offer a variety of research products including **CONSUMEREADY™** and **EXPORTREADY™**. **CONSUMEREADY™** provides detailed demographic information on brand strengths and marketing strategies that are crucial to know when competing in international markets. **EXPORTREADY™** is based on our on-going business strategy research that allows us to establish strengths and weaknesses of firms in a wide variety of areas, ranging from intellectual property portfolios to strengths of marketing strategies to quality of engineering. These results are highlighted in our **EXPORTREADY™** publications and form a valuable tool for firms wanting to strategize their market entry options in international markets.

Our corporate values are: Top-Quality Service to Clients, Commitment to see the Client Succeed, Excellence and Integrity in Research, Transparency and Respect toward our Employees. These core values drive all of our research and every client engagement.
